

## How to Schedule, Record, and Download a BlueJeans Meeting (Audio Only)

2020-05-04 - Taylor Kahny - Comments (0) - Canvas

As there are many different tools students can use to create audio and video recordings and later upload to Canvas for an assignment, it's important to weigh the pros and cons of each one: Is the platform easy to use? Can a number of people log in at once? Does it integrate with Canvas?

For BlueJeans, Penn's current platform for synchronous video conferencing and further recording options, students can schedule a meeting through their actual Canvas course, making it very easy to later click on the recording and download the file to their personal computers. The steps below outline this process.

### 1. In Canvas, select the BlueJeans tab to get started:

### 2. Click to Schedule a BlueJeans meeting:
