# New Canvas Guide Links: Check and Update Old Links

2026-02-18 - Erin Marshall - [Canvas](#)

## Overview

Instructure, the maker of Canvas, has recently updated its [Instructure Community website](#) platform. As a result, many previous links to Canvas guides and help articles have changed, and old links no longer work.

## Action items

Please check any Canvas guide links you may have included in your Canvas site. These links are commonly found in pre-course module overviews for students, e.g. instructions for posting on discussion boards, managing notification settings, or submitting assignments.

## Resources: Replacement links

ITS is aware of the following commonly-used instruction links within Nursing course site templates:

On the [Using Course Technology](#) page:

- [Bookmark the Canvas student guide](#)
- [Set or change your default email address](#)
- [update your notification preferences](#)
- "This is how Panopto will recognize your Canvas account. [See instructions here](#)"

In the [Student Introductions](#) discussion:

- Both links on the page, ([Click here for instructions on how to post to a Canvas discussion](#)) and ([Click here for instructions on how to record or upload a video introduction in a Canvas discussion](#))

## More tips

Use the ["Link Validator" tool](#) to easily identify broken links in your course.

Need help replacing broken links or have questions? Contact the IDLT team for assistance.
